

*The
First Book
of
Chelmsford Town Records*

*Copied from the original. under vote
of the Town,
March 21, 1892.*

This book is copied literally from the First and Second books of Town Records. and the entire work has been carefully verified. Where a word or part of a sentence is illegible, or wanting, the discrepancy is indicated by brackets; these are filled out where the missing text could be supplied from the transcript of 1742, or from any other source. The numbers in parenthesis indicate the corresponding page in the original.

Of the First book one of covers and considerable of the book were found to be missing. Five loose leaves and the first fourteen pages without page numbers, are mainly records of land grants. The leaves from these to page 100, - which contains the record of the town meeting of 1670, - are missing. In this missing part were doubtless the records of the first town meetings, as these are in the transcript of 1742. (Book A) The pages from 159 to 171, from 190 to 200, and from 205 to 210 are also missing.

This loss is the more to be regretted as in the transcript of 1742 it appears that only such records were copied as the committee deemed important. Their transcript consisted of but 57 pages, exclusive of the vital statistics, 26 of which are before 1670. while it has required 156 to contain what is now found in the original first book (exclusive of births marriages and deaths.)

In the record of births, marriages, and deaths, in the first book, no entries are found in the old transcript not now found in the original, and there are many more which are mostly incomplete and were evidently omitted from that transcript for that reason or because they could not be deciphered. A statement which appears at the end of the record of deaths in the transcript of 1742, shows the condition of the first book at that time. It reads as follows:

"Chelmsford December the 28th 1742.

It is hereby certified that the First Book of Records in the sd Town in many places was torn and Defaced and in other places the Births and Deaths wholly Lost

and in some places the month or year missing that all
could not be perfectly Transcribed but they have been
all carefully examined and Transcribed into this
Book according as they appeared in the 1st first Book.
for Benj. Adams
Town Clerk"

In the second book, the covers and the
greater part of the book are missing. It has
required but 54 pages, (exclusive of index and vital
statistics) to contain what was found, while the
transcript of 1743 has 223 pages covering the same.

The second book, consists principally of records of
land grants and highways. Of the record of births,
marriages, and deaths, in the second book; all that
were found in the transcript have been copied as
well as those in the original. 20 pages of births,
2½ pages of marriages, and all of the deaths are
from that transcript.
